On October 17th, SEQUENCES presents an audio/visual concert dedicated to the dynamics between experimental film/video art and alternative music in a live setting.

TRANSFORMA –An experimental film collective from Berlin joins forces with Australian noise wizard BEN FROST and experimental music collective Bedroom Community in an improvised performance comprised of Ben's music and Transforma's visuals.

French visual artist YROYOTO runs an interesting video label in Paris called ExplosiveTV, dedicated to experimental video works. His offering for Sequences is an interactive audio/visual performance, celebrating live sound and video manipulation.
